# Videofluoroscopic Studies Of Speech In Patients With Cleft Palate

## Synopsis

In Videofluoroscopic Studies of Speech in Patients with Cleft Palate, Drs. M.L. Skolnick and E.R. Cohn present multiview videofluoroscopy as a technique for the radiological evaluation of speech defects in patients with cleft palate. Dr. Skolnick's invaluable contributions as both the originator and leading authority on the subject are discussed in a concise, clinical fashion. Topics examined include the anatomy and imaging of the velopharyngeal portal; the equipment and techniques of multiview videofluoroscopy; the interpretation of results and various patterns of velopharyngeal closure; Passavant's Ridge and patterns of velopharyngeal closure; normal and abnormal speech production; and the evaluation of test results. This book is the only source which concisely and completely describes the technique and its interpretations for those who need a description of the clinical procedure.

## Book Information

Paperback: 186 pages

Publisher: Springer; Softcover reprint of the original 1st ed. 1989 edition (January 1, 1989)

Language: English

ISBN-10: 1461388767

ISBN-13: 978-1461388760

Product Dimensions: 7 x 0.5 x 10 inches

Shipping Weight: 10.4 ounces (View shipping rates and policies)
